Commissioner Chiappone commented that it was nice to be home and that he was recently in Sedona and while it was nice the traffic was murder. He then related a recent incident at Wildman's in Cooper Landing upon meeting up with a woman from Homer of a certain age, as we state, was upset about the way Homer was changing and he hears that sentiment all the time from people of a certain age all the time. He then expressed his amazement of the amount of sulfur and questioned where that came from not that it was any consequence.

City Planner Abboud commented that it came from North Kenai Nikiski.

Commissioner Stark stated that he hears the same type of comments frequently also. he then stated that he was one of the Longshoreman working on that sulfur project and noted how it was just a crazy thing, 24/7 getting that stuff loaded. AGENDA ITEM REPORT

Correction of Town Center District Uses and consideration of multiple dwellings in Residential and Central Business Districts.

Item Type: Action Memorandum
Prepared For: Planning Commission
Meeting Date: 04 Jan 2023
Staff Contact: Rick Abboud, City Planner
Department: Planning
Attachments: [Draft Ordinance 23-xx](#)

Summary Statement:

After adoption of Ordinance 22-68(A), I found a typo error and an opportunity for clarification. I have found an-inadvertent oversight where the indoor and outdoor recreational facilities uses were added to conditional uses in the Town Center District and were not deleted from the list of permitted uses and structures in the district. Additionally, questions regarding the amount of dwellings in the districts where up to four structures/units are allowed to be permitted outright were raised.

Analysis

The conditionally permitted items is easily cured by the by the attached simple amendment deleting them.

The issue raised about multiple structures is discussed below.

Rural Residential

Allowance for dwellings depends of delivery of water and sewer. If one has city water and sewer services, they have an allowance for a dwelling per 10,000 square feet of lot. If someone has just water or just sewer service they have an allowance for one dwelling per 20,000 square feet. If one has access to neither city water nor sewer they have an allowance of 40,000 square feet per dwelling.

The new code provides an allowance for multiple structures, *"Up to four dwelling units, excluding mobile homes, on a lot subject to the requirements of HCC 21.12.040 and located in an area*

depicted for Urban Residential zoning by the Future Land Use Map in the 2018 Homer Comprehensive Plan.”

The code, when applied in entirety, adequately addresses density and site development standards. The spatial requirements dictate that, in any event, no more dwelling units than prescribed in code are allowed (as described above). The allowance for duplex or multi-family structures in addition to single-family structures could limit site impact when compared with single unit structures (which is the preferred choice, so far). I believe it is the best policy that 4 dwelling units are allowed in any format that is allowed in the district. This provides developers with a choice to consider options that may minimize overall site impacts. In any event, one could not exceed the number of dwellings allowed dependent on water and sewer service. Below are the definitions of the dwellings permitting in all the districts where up to four structures are a permitted use.

“Dwelling” or “dwelling unit” means any building or portion thereof designed or arranged for residential occupancy by not more than one family and includes facilities for sleeping, cooking and sanitation.

“Dwelling, duplex” means a building designed or arranged for residential occupancy by two families living independently, the structure having only two dwelling units.

“Dwelling, multiple-family” means a building or a portion thereof designed for residential occupancy by three or more families living independently in separate dwelling units.

“Dwelling, single-family” means a detached dwelling unit designed for residential occupancy by one family.

Urban and Office Residential Districts

Here the question of dwelling density was brought up.

The language is under permitted structures and uses states, *“Up to four buildings on a lot for use as dwelling units subject to HCC 21.14.040(a)(2)(a) and (b), excluding mobile homes.”*

Requirements for permitted multi-family:

21.14.040(a)(2)(a) and (b),

a. The total floor area shall not be more than four-tenths the lot area;

b. The total open area shall be at least 1.1 times the total floor area. Open area is any portion of the lot not covered or used for parking spaces and maneuvering.”

Current regulations address acceptable densities. In these districts, single-family, duplexes, and multi-family dwellings are allowed as permitted structures. When up to four buildings are proposed,

they are required to meeting the floor area ratios stated above for multi-family dwellings. This does not introducing a greater allowance for development, it makes an allowance for additional formats in which to deliver multiple dwelling units. The intensity of the use is not any different than that of what is permissible in a multi-family scenario. In these districts one could find single-family dwellings that exceed the floor area ratio for multi-family structures. It is appropriate to have allowances for similar uses and structures that are permissible in the district.

Central Business District (CBD)

Here the permitted uses and structures allows, “Up to four buildings on a lot excluding mobile homes, except as provided for in HCC 21.18.030.” HCC 21.18.030, Conditional Uses and Structures does require a conditional use permit (CUP) for more than 4 buildings. There are no restriction that limits this to dwellings only, as both residential and commercial development is allowed in the district.

To consider the effect of the change we must look at all the applicable regulations. In the CBD, a level two site plan per HCC 21.50.030 is applicable. This section of code regulates disturbances including provision for slopes, drainage, development activity plans, storm water plans, and landscaping requirements. Additionally, per HCC 21.18.040(d), if all buildings combined were over 8000 square feet or the building area was in excess of 30% of the lot, a CUP is required. Nothing about site development requirements would change except that one could add up to four separate structures without a CUP, if the development did not trigger the requirement provided in other provisions of code. The provision in applicable to both dwellings and commercial structures.

In consideration of the options for ‘up to four structures’, I find that the code change is beneficial to the City of Homer. The changes make it less onerous to develop in an acceptable fashion in accordance to long-standing development regulations, a new format is allowed that is not introducing additional allowances for density or site development. It also supports an avenue for possible provisions of affordable housing options.

Staff Recommendation:

Review the proposed amendment and recommend a public hearing:
